

SIGHTMANAGER®: THE REVOLUTIONARY DOCUMENT REVIEW MANAGEMENT TOOL

Until now, the logistics of managing and supervising personnel working on offsite document reviews has often been difficult, time-consuming and expensive. No more. SightManager provides cutting-edge monitoring and reporting tools that allow you to manage multiple projects securely and efficiently without leaving your office.

Real-time review monitoring: Full control, without standing over their shoulders.

With thumbnail and on-demand full screenshots of each document reviewer's desktop, you can monitor the quality and efficiency of your project. Real-time monitoring provides an instant glimpse of WHO is working and WHAT they are working on, from any computer, anywhere. You can even collaborate with reviewers to work with them in documents, as needed.

Your review, wherever and whenever you need it.

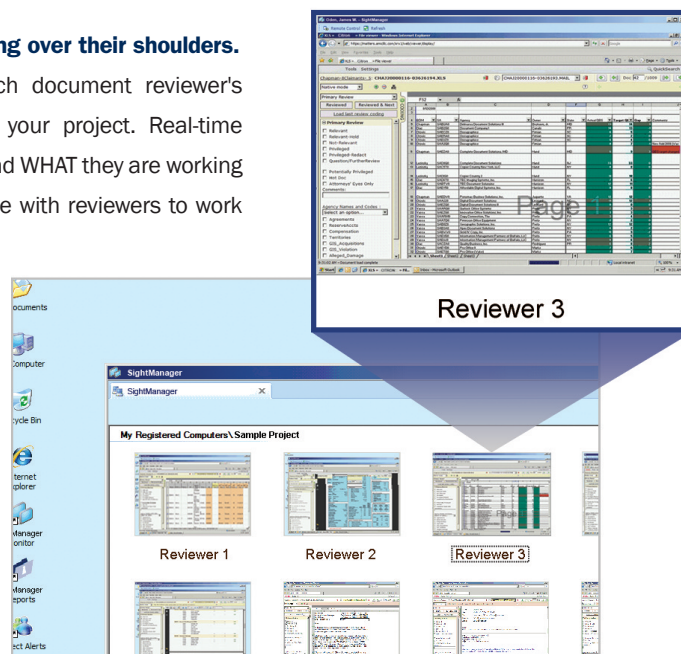

This remarkable new technology will produce enormous cost savings for your projects, whether your reviews are housed in one of our state-of-the-art TurnKey Legal Centers or in another location. Imagine having a nationwide pool of reviewers available at a moment's notice, and being able to supervise their work closely without leaving your office. Now you can.

Productivity and activity reporting.

SightManager's performance management and real-time metrics serve as perfect complements to whichever electronic discovery tool you choose to use. Supervisors can generate comprehensive reports on reviewer activities on any Internet-based review platform.

User alerts: Make sure you have the reviewers' attention.

Let individual team members or the entire team know important information quickly by sending an alert. Reviewers will instantly receive a notification on their screens and will be required to acknowledge the alert before continuing their work.

Revolutionary? Yes!

SightManager has changed the face of document review:

- Supervisors can manage a project from anywhere
- The talent pool of reviewers is unlimited by geography, scheduling or equipment
- Review team size is not constrained by the physical dimensions of project facilities

Technical specifications

- Works with ANY Internet-based review application
- 24/7 dedicated support
- Highly secure: Case-related information is neither hosted nor retained
- Substantially reduces hardware and bandwidth requirements
